

THETA DELTA CHI

Just up the "Drive" a stone's throw from Tech stands the Theta Delta Chi house looking out on the waters of the Charles. Collegiate atmosphere is supplied by the Harvard and Tech crews as they slice through the water in daily practice. This however, does not lead Theta Delts into a false sense of security, for we, like most of the other fraternities on the campus, control study conditions so that the demands of "the scholarly life" shall not overwhelm us.

Nevertheless there are times when books are laid aside and the chapter takes an active interest in Institute affairs. The hour from five to six finds some of us on the football and lacrosse fields, others rehearsing with the orchestra or working on publications, and still others out sailing. For relaxation, a bridge game after dinner or a little ping-pong seems to be quite in order.

Throughout the week, however, there is no better driving force than looking forward to a Wellesley date for the weekend. No one has yet been known to find a comparable alternative to that one. No one, very probably, has tried. Almost every other weekend the job of entertaining

dates is shouldered by the house itself, as carpets are rolled up for an informal "vic" dance. Mingled pleasantly with these are the larger dances. The house itself has three dances (formal in the past, but very probably informal for the duration) during the year. For those who enjoy the more active life, there are a number of bicycle riding and hiking trips in the fall, while in the winter ice skating and skiing trips are the thing (not to mention the innumerable snowball fights). Later in the spring when "a young man's fancy lightly turns..." the more romantic souls embark on twilight canoe trips. So Theta Delta Chi rounds out the year.
